Your Essential Cleaning Guide for Earthly

Fabrics Don't Look After Themselves...

Earthly

Earthly should be cleaned regularly.

Remove spillages promptly with an absorbent dry cloth.

Solid stains should be removed gently first, before being wiped with a damp cloth in a circular motion.

It is essential that all residue is removed from the surface.

Do not leave liquids in situ.

Do not use solvents, abrasives, synthetic detergents, wax polishes or aerosol sprays.
